### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Kallis on July 22, 2004.

The application has been amended as follows:

**In the claims:**

Claim 5 is dependent on claim 1 instead of cancelled claim 4.

### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: The main reason for allowance of claims 1-3, 5, 7-9 is that the prior art does not show or make obvious a torsion module of a torque detection device for a steering system of a motor vehicle as shown in claim 1. Applicant discloses a torsion module comprising first and second rings which are attached to a rim to rotate with the rim relative to the hub in which the rings are indirectly connected to the hub by the rim and include projections which form axially separated limit stops for enclosing bending-resistant limit stop spokes in order to prevent axial movement between the hub and the rim. This limitation in combinations with other limitations of the claims renders this case allowable.

Art Unit: 2855

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
